Experience

Nahuru (Freelance)

Web Developer

www.nahuru.com

Nahuru is a data analytics company, which focuses on audience measurement services for the entertainment and marketing industry. I have been working with Nahuru on various projects on a freelance basis.

Remote

May 2018–Present

Responsibilities and Achievements:

- Implemented website redesign using PyroCMS and Bootstrap.
- Nahurhash - developed torrent hash search UI for their 'Sauto' database using Vue.js.
- Developed a dashboard user interface to display Periscope Data charts.

Tonic Works

Symfony PHP Developer

www.tonic.works

My role at Tonic Works has involved working on various SaaS projects within the Legal Tech sector using Symfony and React.

Sheffield

November 2017–May 2018

Responsibilities and Achievements:

- Furthering the development of "QuoteXpress" CRM system using Symfony and React.
- Building a PHP API wrapper for the Land Registry SOAP API.

Twinkl Educational Publishing

Web Developer

www.twinkl.co.uk

Twinkl is an online educational resource company with over two million registered users worldwide. My role has involved furthering the development of the Twinkl website and internal systems using PHP and MySQL.

Sheffield

November 2016–November 2017

Responsibilities and Achievements:

- Built a help desk ticketing system in order to bring customer support into one place. A part of this made use of the the Gmail API to send and receive emails via the help desk.
- Used the Paypal API to build system to allow colleagues to send payment requests to users and also make refunds through the system.
- Modernised processes in the web team such as using Composer, using Xdebug and switching to PHPStorm.

ToucanTech

Web Developer

www.toucantech.com

ToucanTech is community management software for institutions such as schools and universities. It is composed of two major sections, a front end community network portal and an admin portal, which includes a user database, CRM, email engine, CMS and fundraising tools.

London

July 2014–November 2016

Responsibilities and Achievements:

- My role involves working closely with the founders and CTO to develop new features and functionality using PHP, CodeIgniter and MySQL.
- Some key features that I have developed have included:
 - Photo gallery module, which allows users to upload and view photos on the network.
 - Activity tracker module, which allows school administrators to keep of a log of activities with end users.
 - Various enhancements and bug fixes to keep the networks running smoothly.
- Recruiting and training new junior developers.

BusinessBecause

Web Developer

www.businessbecause.com

My role involved furthering the development of the niche networking website, BusinessBecause, a global network for MBA students. The website is built in PHP/CodeIgniter, incorporating modules from PyroCMS.

London

September 2013–September 2015

Responsibilities and Achievements:

- Created new features and functionality using PHP, CodeIgniter and MySQL as well as updating the front end using HTML5, CSS3 and JavaScript.
- Simplified the registration process, which allowed people to register using their LinkedIn and/or Facebook accounts.
- Optimised the website for mobile, using HTML5, CSS3 and Bootstrap, which led to an increase in traffic from mobile users.

Compliance Control Ltd

Software Developer (Industrial Placement)

This was an industrial placement as part of my degree. I was involved in developing "ComplianceControl Centre", an electronic document and quality management system for use in the pharmaceutical and life sciences industries. This was written using PHP and an Oracle database. Also included building the front end using standards compliant XHTML, CSS and JavaScript

Northwich

June 2011–September 2012

The Shrewsbury and Telford Hospital NHS Trust

IT Technical Support Assistant

This was a general IT support role, my main duty was replacing and configuring old computers throughout the hospital. In addition, I was also responsible for fixing day to day IT problems for end users.

Shrewsbury

June 2010–September 2010

Education

Aberystwyth University

BSc (Hons) Computer Science

2009–2013

The Thomas Adams Sixth Form

A-Levels

History, IT, Geography

2007–2009

The Thomas Adams School

GCSEs

10 including English and Maths
